Beyond the Bligh, Fiji

Year Round 7 & 10 nights,

Siren Fleet diving liveboards offer you the option to explore Fiji to its fullest. The *dive sites* in this region vary from steep walls to sandy slopes with coral gardens where you can easily see *manta and eagle rays* as well as schools of unicorn fish & tuna. Colourful *butterfly fish* species graze over the reef and huge potato grouper are also to be found here. Smaller creatures such as *blue ribbon eels*, hawk fish and leaf fish give macro lovers something to watch out for too. But the real draw for the region is the sheer *variety of sharks and rays* that will be seen - white tips, black tips, silver tips and grey reef mix in with *hammerheads*, whilst whale sharks and tiger sharks may be spotted occasionally. This is one elasmobranch soup you'll be pleased to see!

Fiji Liveaboard Diving Itinerary

Departing from the Darling family's Volivoli Beach Resort on Viti Levu, our 7-night and 10-night liveaboard dive trips on the S/Y Fiji Siren take you through dives at *Bligh Waters* with stunning coral pinnacles which attract schooling pelagics including *barracuda & tuna*. We cruise onwards through the Vatu-I-Ra Passage to dive at the *Namena Marine Reserve*, where hard coral gardens support a myriad of marine species and schools of colourful reef fish. The S/Y Fiji Siren then moves south into the the Lomaiviti Island Group for dives at the islands

of Gau and Wakaya. A mix of drift dives, coral gardens and pinnacles is to be expected, keeping on the look out for *manta rays and hammerheads* but also we see ribbon eels, leaf fish and numerous other smaller creatures. *Grey reef sharks* can be seen in schools at the mouth of the Nigali Passage. We have the option to return to the Namena Reserve or dive once again in Bligh Waters as the S/Y Fiji Siren cruises back to her home port at Volivoli.

10-night cruises will continue north-east to Taveuni Island and the Somosomo Strait, aka *Rainbow Reef*, so named for the swathes of colourful soft corals which adorn the reefs. You can also expect to see many different pelagic fish, sharks, mantas and barracudas. Exhilarating drift dives along the reefs are the norm.
